

# Drive Pro

Snowplow

The Meyer® Drive Pro™ isn't just a snow plow; it's a commercial-grade solution engineered for optimal performance and reliability whether tackling light snow or heavy drifts. Crafted from lightweight, high-strength steel, it offers easy attachment and efficient snow removal for full-size SUVs, as well as light-duty and 1/2-ton pickups.

## Highlights

- Available in a **variety of sizes for use with most full-size SUVs, light-duty pickups, and 1/2-ton pickups**
- **Lightweight, high-strength steel construction** ensures durability.
- **Easy on/off single-pull pin mount** for swift attachment and detachment
- **Fully field-adjustable trip springs**
- Nite Saber LED lights for **enhanced visibility during night operations**

## Your benefits

- **Efficient:** Lightweight, high-strength steel improves fuel efficiency and reduces strain on the vehicle's front end.
- **Customizable:** Adjustable full-trip springs help ensure efficient snow removal in practically all conditions.
- **Enhanced Safety:** High efficiency lighting and lightweight design give you superior operability in most all conditions.
- **Peace of Mind:** Protected by an industry-leading 5-year warranty

## Performance features

### Plow blade

The Drive Pro is precision engineered with durability in mind. It boasts advanced construction techniques like slot-and-tab assembly and laser-cut steel parts assembled by robotic welders. The blade also features continuously welded ribs, reinforced outer wings, and a heavy-duty center support that spans the snow impact zone, giving the Drive Pro unparalleled strength and durability, season after season.

For increased longevity and enhanced safety, the Drive Pro features two trip springs in its standard configuration, with the option to upgrade to eight, allowing it to adapt to different terrain features and obstacles encountered during operation. The Drive Pro also features pre-drilled holes for hassle-free installation of optional snow deflectors, helping to maintain clear visibility through the windshield during plowing operations.

Finally, the Drive Pro is coated with our exclusive Dura-Slick™ Paint, infused with Teflon®, protecting the plow blade against corrosion and wear and ensuring smooth snow rolling and throwing action.

### Operating system

The Drive Pro features the Standard Operating System™, which helps provide industry-leading ground clearance.

The Drive Pro incorporates an encased power unit with adjustable drop speed, and a pistol grip controller for hands-free plowing. Double-click technology automatically moves the moldboard in the desired direction without having to continuously press the button.

Additionally, the Drive Pro features Nite Saber LED lights as standard, giving plow operators the light they need for safe snow removal operations.
