Price:

A highly efficient snow plough that is especially effective in slush and wet snow, but it works well also in other conditions, e.g. powdered snow. The SNK comes in various sizes for mounting on carriers ranging from narrow-track vehicles, combis and pick-ups through to Unimogs and trucks. With its rotomoulded polymer blade, the SNK is a stable snow plough with a low dead weight. The co-ordinated geometry of the blade, cutting edge and angle of attack ensure optimum snow removal, regardless of the consistency and quantity of snow cleared.
